# UK Industry facts & figures 2019

- > Major contribution to UK jobs, skills, exports & growth
- > In 2018 the UK aerospace, defence, security and space sector's contribution to the UK was:

# ADS Toulouse – A strong footprint in France

- > Established in 1999, ADS Toulouse is a French wholly owned subsidiary of ADS, the leading trade association for UK aerospace, defence, security and space sectors. 100% financed by its members. ADS Toulouse is a member of the Aerospace Valley cluster since January 2018.
- > ADS Toulouse staff is tasked to connect and give access to UK aerospace suppliers to business opportunities in the French aeronautics, space, defence and embedded systems markets.
- > ADS Toulouse promote UK expertise in the aerospace sector.

# ADS Toulouse members 2020 – 28 companies

ALA - Advanced Logistics for Aerospace is a stocking distributor and provider of advanced logistics and innovative supply chain services and solutions to the aerospace industry.

With headquarters in Naples-Italy, ALA is present with logistics plants and operating companies in Italy, France, Germany, UK, Israel and in the US. Products managed include fasteners, machined components, connectors, indirect materials, drawing parts and non-metallic panels, spare parts.

## Areas of expertise:

- Lean supply chain management solutions
- Suppliers relationship management
- Inventory management
- DLF and JIT delivery
- Third Party Logistics
- Consignment stock
- Kitting

# ASG Group

## Core Activities

### Aerostructure & Aeroengines

The manufacture of mill turn components, complex 5 axis (up to 4m) in both hard and soft materials & assembly

### Design & Tooling

Design and manufacture specialists of large invar layup tools for composite airframes, jigs & fixtures & transportation media

### Year established

2019

### Employee Number

350+

### Annual Sales

£43M

### Certifications & Approvals

AS9100 Rev D, BS EN 9100:2008, BS EN ISO 14001, BS EN ISO 9001:2015. Airbus, Bae Systems, Rolls Royce, Spirit Aerospace, Leonardo, GKN Aerospace, GE Aviation, Bombardier amongst others

ASG Group consists of an aerospace & tooling division. The seven companies within our group have extensive experience working within the Aerospace division, working with all major OEM & sub tier companies. With an ever-expanding global footprint, the groups strategic intent is to develop & deliver 'Aerospace Group Capability' in both tooling & manufacturing; be global market compliant & be flexible to both tactical & strategic demands. With over 125 CNC machines across the division & the ability to invest in latest machine tool technologies we can increase capacity & production efficiencies to suit our customer requirements & keep up with the evolving market. Our tooling division offers full turnkey solutions and specialize in the design and manufacture of large invar layup tools for composite airframes, jigs & fixtures & transportation media. Repeat business is the ultimate accolade of any business and we are proud to say that we continually attract further business from existing customers. This is down to our quality, delivery and competitive pricing

### Areas of expertise:

#### Aerostructure & Aeroengine

- CNC 5 and 3 axis Long & short bed machining in both hard & soft materials up to 4.2M
- Turning & mill turn in both hard & soft materials up to a diameter of 500mm.
- Grinding
- General Assembly
- AOG 24/7 Service

#### Design, Tooling, Jigs & Fixtures

- Design & Manufacture of Tooling, Jigs & Fixtures & transportation media
- Large metallic mould tooling in invar, steel & aluminium
- Assembly Tools & Fixtures
- Details Tools
- Composite moulding Mandrels
- Tool Design
- Development Capability

The Bollhoff Group, established in 1877, is one of the world's leading manufacturers and suppliers of fasteners and assembly systems. The family-run company focusses on long-term success, achieved through highly qualified employees, innovative products and customised services.

The product range comprises different technologies, e.g. thread reinforcement, riveting, adhesive technology and many more, which are exclusively manufactured at Bollhoff production facilities. They are subject to stringent quality checks in every single production step.

Bollhoff is represented by own distribution facilities and production sites in 24 countries on all continents.

## Areas of expertise:

### Core Activities

BOXARR is a unique software solution for solving complexity in supply chains, business processes and product systems

Year established 2003

Employee Number  
20 + Alliance Partners

Annual Sales  
€5M

Certifications  
Cyber Essentials

Approvals  
Approved for production deployment at several global aerospace OEMs

Conceived from a collaboration between Rolls Royce Plc and the University of Southampton, BOXARR delivers scalable applications that solve complex systems of inter-dependency.

Customers realising benefit from BOXARR now include Airbus, Boeing, Safran, RR, Siemens, Deloitte, MoD, the US Navy and many others. Simplifying the complex, BOXARR's software highlights the risks and opportunities hidden within supply chains, business processes and product systems.

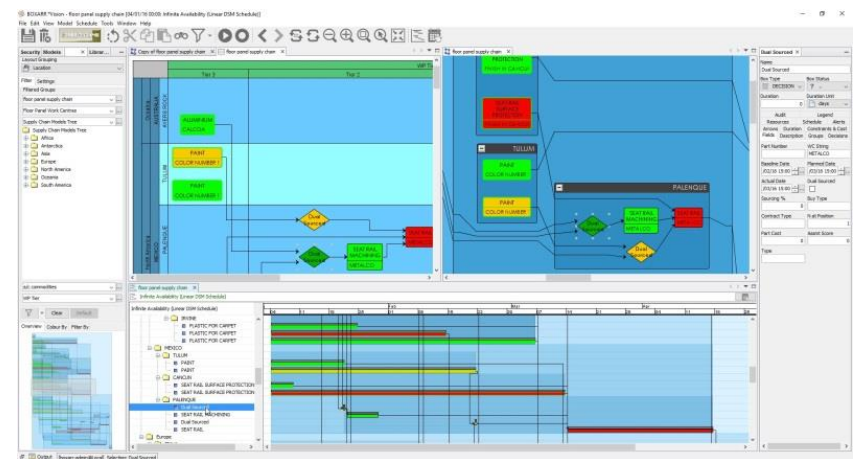

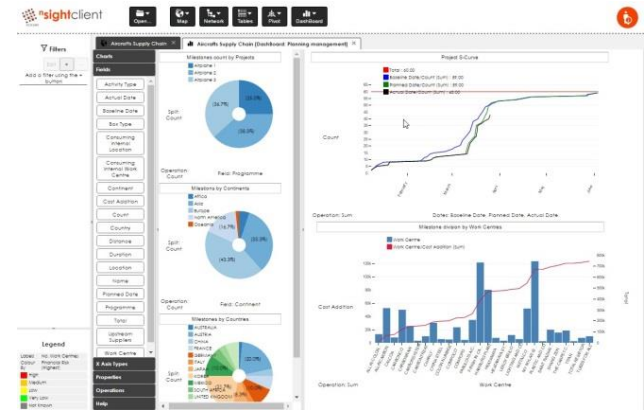

Manufacturers using BOXARR gain much deeper visibility to mitigate risks, reduce unnecessary costs, design-in resilience and respond quickly to disasters or opportunities. Innovative and unique, no other solution enables organisations to understand their business processes, release value and mitigate risks in this manner.

### Areas of expertise:

- Business process planning, management and lean improvement
- Data intelligence aggregation
- Joint operations methodology
- Mission/program planning & execution
- Production process planning and rate improvement
- Supply chain mapping, modelling, analysis and improvement
- Systems design & engineering

CASTLE METALS is a leading provider of metals, services, and supply chain solutions. We distribute and process alloy, carbon, stainless steel, nickel, aluminum, titanium, cast iron, and red metals.

Together, Castle and its affiliated companies operate out of 22 metals service centers located throughout North America, Europe and Asia. Operating in 3 locations in Europe, we work with international OEMs to better serve their multi-location production requirements and delivery needs.

We also help the thousands of machine shops that service the OEMs or have their own niche end market. We leverage our long-standing metals expertise and focus on processing and other value-added services to meet the unique requirements of industries such as aerospace, defense & space.

## Areas of expertise:

- ALLOYS: Aluminum, Titanium, Nickel Alloys, Stainless steel, Bronze / Copper
- PRODUCT: Plates, Sheets, Bars, Tubes, Extrusions
- PROCESSING: Sawing, Water jet cutting, Laser cutting, CNC machining, Chamfering/Drilling, Deburring
- SERVICES: Bar coding, VMI, Just In Time, Consignment stock, Kitting, Kanban

Cyient provides engineering, manufacturing, geospatial, digital, networks, and operations management solutions to global industry leaders. Cyient leverages the power of digital technology and advanced analytics capabilities, along with domain knowledge and technical expertise, to solve complex business problems. As a Design, Build, Operate and Maintain partner, Cyient takes solution ownership across the value chain to help clients focus on their core, innovate, and stay ahead of the curve.

With more than 28 years of service, Cyient is in the business of solving problems, and 98% of our clients are repeat customers. We operate from 47 locations across 21 countries adeptly combining global delivery with close proximity to 300+ clients for industries such as Aerospace & Defense, Communications, Energy, Geospatial, Industrial, Medical & Health Care, Mining, Rail, Semiconductor and Utilities.

## Areas of expertise:

- Aerospace & Defence: System-level engineering solutions across engines, avionics, systems, structures, & interiors.
- Rail Transportation: Design solutions in rail rolling stock, rail signaling, & electrification.
- Oil & Gas: Design solutions for drilling, completion & subsea equipment, complying with class rules.
- Heavy Equipment: Subsystem-level engineering & integration for construction, mining, agricultural & material handling equipment.
- Consumer: Patentable engineering solutions by identifying IP gaps & localizing home appliances, personal care & consumer electronic products.
- Semiconductors: Application-specific system development in "full chip silicon" design, verification & implementation services across industries.
- Medical: Engineering of affordable & innovative medical devices from industrial design to manufacturing, adhering to stringent regulatory requirements.

Most major Aerospace OEMs &  
Tier 1 approvals

Darchem is a subsidiary of the US quoted, Seattle based, Esterline Technologies Corporation.

We have three areas of aerospace expertise: Insulation Systems; Metallic Honeycomb; Structural components.

Between these areas we supply around 600 different part numbers on existing Airbus platforms. This includes Over 200 parts on A350, Over 150 parts on A380, Over 150 parts on A400M.

In addition to Airbus direct supply, Darchem also supplies GKN, Sonaca, Safran, PFW, Premium Aerotech, Senior

Darchem's commitment to Lean / Continuous Improvement resulted in our being assessed as the best Company for implementing the Esterline Operating System at the end of 2016.

## Areas of expertise:

- Insulation (metallic; polyimide & composite) – including a range of light weight insulation
- Structural components in hard metals (mainly titanium & steel) – formed, welded & riveted components
- Qualified Fire Test Facility
- 3D rapid printing for tools
- In house tool machine shop for small tools

### Annual Sales

£392m (2019)

### Certifications

Multiple Aerospace Standards

### Approvals

Multiple Aerospace Standards

Doncasters is a leading international manufacturer of high-precision alloy components made for the most demanding conditions.

With 240 years of experience, this agile group is constantly developing its expertise to best serve OEMs in the aerospace, industrial gas turbine and specialist automotive markets.

Core areas of expertise include new product development, precision casting, superalloy production and the supply and manufacture of automotive stud welding equipment.

### Typical aerospace market activities:

#### Superalloy Production

Producer of vacuum refined cast nickel /cobalt superalloys and air melted alloys.

#### Key Products:

Continuously cast superalloys, air and vacuum melt superalloys, ingots and bars

#### Structural Castings

Manufactures complex precision components using primarily equiax casting

#### Key Products:

360 degree housings, seal segments, air seals, centre frames, nozzles, heat shields, airfoils, torque bars

#### Turbine Airfoils

Manufactures DS, SX & equiax blades and vanes for the hot end section of aerospace & IGT engines

#### Key Products:

Blades and vanes from stages 1 through 4 of the hot end section of IGT engines and aero engines

## Approvals

Gardner Aerospace holds numerous industry approvals, including: FAA CAA EASA

Gardner is one of the aerospace industry's largest and most diverse manufacturers of finished machined and fabricated Detailed Parts made from hard and soft metals.

Most OEM and Tier 1 customers also take advantage of Gardner's sizable assembly, kitting and/or large scale speed shop services. It has substantial Programme, Supply Chain, Transfer and Quality management organisations to support all requirements and has five modern aerospace approved manufacturing operations in the UK, two in France, two in Poland and one in India.

Annual revenues exceed \$200m and it employs over 1,500 people worldwide.

## Areas of expertise:

- Strategic supplier to its customers and one of the clear leaders in the consolidation of the overly fragmented aerospace detailed parts sector
- Excellent reputation for delivery, quality and responsiveness
- International and highly experienced management team
- Backed by highly supportive financial investors with experience of aerospace and manufacturing.
- Customer and relationship focused, creative, flexible, willing to listen, to learn and to change.
- A proven track record of organic and acquisitive growth.

## Approvals

Major International Aerospace OEMs: Airbus, BAE Systems, Rolls Royce, Safran, etc.

IFA is a premium supplier of high integrity forged products to quality markets globally. They have created a fully integrated metals service centre which has grown to be a leading provider of quality open die forgings, making safety critical components in service conditions from the deepest oceans to outer space.

Their forging is complemented by their UKAS & NADCAP accredited IFA Technology centre and NADCAP accredited heat-treatment facilities, which along with their machining centre allows the complete in-house controlled processing of raw material to neat net shape semi finished components.

They participate in the growing sectors of Aerospace, Energy, Oil and Gas and Power Generation (including Nuclear) and high-end Advanced Engineering.

## Areas of expertise:

- Work closely with customers to problem solve and optimize supply
- Highly skilled, technically experienced partner for forging Titanium, Nickel and other Aerospace alloys
- Flexibility of supply – Sizes/Lengths/Quantities/ Destinations
- Fast track specialised deliveries and volume contract deliveries
- Fully integrated one-site process flow

Kaman UK offers a vertically integrated manufacturing service of aerostructures and aeroengines for the Aerospace & Defence sector. Our extensive facilities include six autoclaves, with the largest measuring 13m in length by 3.5m wide, 300 sqm of clean room for lay up, an Airbus approved in-house laboratory, NDT facilities, comprehensive sheet metal fabrications facilities, spray booths, dedicate assembly areas and a recently commissioned fully automated treatments line.

We manufacture composite structures in-house, along with metallic fabrications and CNC machined parts and can offer our customers a 'plug and play' assembly direct to their FAL.

## Areas of expertise:

Composite & Metallic Structures, Kits & Assemblies to OEM's and Tier 1's in Civil and Military Aerospace, including –

- Composite structural components and assemblies
- Fabrication of soft and hard metals
- CNC machined parts
- Parts, Kits, Sub-Assemblies and Assemblies combining composite and metallic structures with associated systems and treatments
- In-house treatments including PFD, chromic acid anodise, NDT, primer and top coat paint
- Ground Support Equipment
- EASA approved spares and repairs
- Wing control surfaces and Fuselage panels (monolithic and sandwich)
- Ailerons, Winglets, Rudders, Doors
- Wing Access Covers, Flap Track Top Covers
- Engine and Thrust Reverser Panels
- Missile structures, casings and wings

Magellan Aerospace (UK) Ltd is a subsidiary of Magellan Aerospace Corporation who is a leading global supplier of technologically advanced aerospace systems, components and assemblies. As one of the most integrated and comprehensive aerospace industry suppliers in the world, Magellan designs, engineers and manufactures a wide range of aero engine and aerostructure components for aerospace markets, advanced products for military and space markets, and complementary proprietary products for the power/oil/gas markets.

Magellan produces repair and overhaul, test, and aftermarket support services for a variety of engines, and engine structural components. Magellan enjoys strong supplier relationships with OEMs, space, civil, and defence organizations and sells to the global aerospace markets. Magellan is recognized by its customers for its innovative technology, original concept design, quality manufacturing, and total program solutions

## Areas of expertise:

- Aerostructures : Machining , Assembly and Kitting / Design and Systems Integration / Aluminium, Titanium and Composites
- Aero Engines : Machining and Assembly / Fabrications / Technology Development
- Repair and Overhaul : Engine component / assembly and test
- Sand Castings : Aerostructure and Aero Engine capability
- Speciality Products : WSPSTM – Wire Strike Protection Systems / Industrial Power Generation Systems
- Rockets and Space : Rocket and Weapon Systems / Satellites

AS9100 REV C

Maycast-Nokes is a precision engineering company which manufacture precision sand, investment/lost wax and gravity die castings in aluminium and steel. We supply fully finished castings for aerospace, defence, automotive and general engineering applications. In addition to our two foundries we operate a simultaneous 5-axis equipped machine shop and our extensive in-house facilities include heat treatment, metallurgy labs, non-destructive testing (PFD, X-Ray) and pattern shops.

## Areas of expertise:

- Investment/Lost wax casting
- Precision sand casting
- Gravity die casting
- Machine shop
- Radiography
- PFD
- Heat Treatment
- Pattern shop

# MSM aerospace fabricators

## Core Activities

Manufacture and repair of complex sheet metal components and assemblies  
Engine and nacelle fabrications  
ECS, anti-ice and bleed air ducts and components  
Ozone converters & heat exchanger headers  
Leading edge & nose rib pressings  
EASA MRO of intakes, exhausts and ducts

## Year established

1937

## Employee Number

60

## Annual Sales

£6M

## Certifications

AS9100, Nadcap, EASA145

## Approvals

Airbus, Rolls-Royce, Safran, GKN Aerospace, UTC Aerospace Systems, Honeywell, BAE Systems, Spirit Aerosystems

MSM aerospace fabricators is a leading SME manufacturer specialising in complex forming and welding of high temperature metals. MSM has a 80 year heritage in the manufacture and repair of aerospace components such as bleed air ducts, anti-ice piccolo tubes, ozone converters, intakes and exhausts, nacelle and heat exchanger fabrications, fuel, oil and water tanks.

## Areas of expertise:

- Hydroforming of sheet metal
- Rollforming of sheet metal, cones and tubes
- Bulgeforming of tubes and cones up to 1m dia.
- 5 axis laser profiling
- TiG, auto & resistance welding
- Laser welding
- VTL and CNC turning
- NDT and pressure testing
- CMM laser scanning
- CAD sheet metal forming simulation
- EASA145 MRO organisation

 Ametek, Spirit Aerosystems,  
 Moog Aerospace, Eaton  
 Aerospace, Babcock

Nasmyth Group was established in 2003 following the acquisition of Bulwell Precision Engineers Ltd and Metal Process Services Ltd. We specialise in low and high volume machining for complex components up to 1.7m in length or diameter in aluminium, titanium, stainless steels, nickel and cobalt alloys, magnesium and non-metallic materials.

Our turnkey fabrication solutions are used to manufacture airframes, submarine components and other complex structures up to 8m x 4m and 20 tons in weight.

Clean room assemblies integrating both mechanical and electrical components can also be produced.

## Areas of expertise:

Core capabilities and facilities across the Group including:

- Precision Machining
- Processing and Surface Treatments
- Assembly & Testing
- Fabrication & Welding
- Machined Fabrications
- Heavy Fabrications
- Supply Chain Integration
- Design & Reverse Engineering
- Maintenance, Repair & Overhaul
- Low cost Manufacture
- Low cost Engineering support

## Pioneering the power that matters

Rolls-Royce pioneers cutting-edge technologies that deliver the cleanest, safest and most competitive solutions to meet our planet's vital power needs.

With the digital revolution blurring the boundaries between our physical products and the services we provide, we see a future where our engines are connected, contextually aware and even comprehending.

A future where we design and test engines digitally, service them remotely and manage them through their digital twin. A future where, once again, we are pioneering the power that matters, just like we have throughout our history.

Rolls-Royce Civil Aerospace is a major manufacturer of aero engines for the large commercial aircraft, regional jet and business aviation markets.

The business uses its engineering expertise, in-depth knowledge and capabilities to provide through-life support solutions for its customers, who operate 13,000 Rolls-Royce engines on 35 aircraft types.

## Areas of expertise:

Around 400 Trent turbofans are delivered by Rolls-Royce to Airbus in Toulouse every year. The highly-capable team in Toulouse specialises in:

- Aircraft development support – ensuring engine development supports the requirements of new aircraft programmes.
- Sales and Marketing – co-ordinating activity with our key customer, Airbus, ensuring engines are sold to airlines worldwide.
- Engine delivery – working with partners in Toulouse to ensure high quality engines are delivered on time.
- Aircraft delivery - to support the Airbus production process in order to deliver aircraft on target

Sigma is a leading manufacturer of rigid pipe assemblies, ducting, fabrications, sheet details, sub-assemblies, machined items, specialist fasteners, assembly and build fixtures for aerospace OEMs and Tier 1's. We also offer finishing and polishing services. With manufacturing facilities across the UK and China, we can also manage the supply chain on our customer's behalf, making the most of our local footprint to deliver lowest cost, lowest risk solutions at every stage of the product lifecycle.

Sigma also offers SigmaLite our weight reduction initiatives, taking weight out of the aircraft by deploying our lightweight technology such as composite tubes, driveshafts and lightweight end fittings.

## Areas of Expertise:

- Supply Chain Integration
- Low cost Manufacture
- Technology Innovation
- NPI, Prototyping & Reverse Engineering
- Complex forming & welding
- Using Soft & Hard Metals
- Rigid Pipe Assemblies & Ducting
- Fabrication & Sheet Details

## Approvals

Bombardier

Takumi Precision Engineering is a leading precision component manufacturing partner with the ability to develop products from concept, through prototyping and onto the full production run.

Expertise in CAM, coupled with an unrivalled skill set on our production floor, positions us as your partner of choice for Aerospace component manufacturing and assembly. Takumi Precision Engineering has an excellent New Product Introduction process that enables us to work with prime contractors in the sub-supply of Aerospace program offloads.

## Areas of expertise:

- **CNC, CAM and CMM Competence:** Extensive expertise in the manufacture and assembly of low to medium volume precision aerospace components. Product portfolio concentrated on aluminum wing and fuselage components. Nature of these machined parts covers Butt-Straps, Shear Ties, Rib Posts and Splices & a wide variety of brackets.
- **Challenging Geometries:** Difficult 3D geometries parts many have challenging thin walled (1.5mm) designs, in line with the industry wide move towards lighter structures and greater fuel efficiency.
- **Machining Centres:** 12 four & five axis machining centres & seven CNC lathes. Takumi also possess Mastercam X6 and CATIA V5-6 R2012 and can accept models in all common industry standards including CATIA, IJES and STEP.
- **Inspection:** Employing best practice methodologies in inspection and review Takumi has 3 Mitutoyo CMM machines, with GEOPAK V3.3, as well as ENOVIA DMU Navigator & 3DVIA Composer. All inspection at Takumi is tailored towards model based inspection, in line with industry moves in this direction.
- **Review:** The business is driven by a fully integrated ERP system called M1.

**Verify Europe serves quality critical industries where quality product being delivered on-time is key. As part of the Verify Group of companies, we are the leading provider of Supplier Quality, Supply Chain Management and Technical support solutions within the aerospace, defence and other high technology markets.**

Verify Europe offers customers the following comprehensive and customisable range of supplier quality, supply chain management and technical support services - all proven to increase quality, delivery and business performance while also reducing costs.

- **Regulatory Audit:** Examination of supplier systems, processes and procedures to determine compliance with a regulation or law.
- **Supplier Survey:** Examination of supplier activities to confirm initial or ongoing compliance to customer performance, quality or schedule requirements.
- **Product Audit:** Detailed inspection and audit of all processes used to manufacture a particular product to ensure the ability to consistently deliver compliant products.
- **Special Process Audit:** Evaluation of a specific process to ensure it conforms to written procedures and workmanship standards.
- **Quality System Audit:** Examination of a complete system or sub-system to determine whether activities and results comply with quality management standards and are implemented effectively to achieve all objectives.
