

A STRONG FOOTPRINT IN FRANCE

NEWSLETTER #13 - JULY 2023

Bonjour à tous,

It's been a month since the Paris Air Show and despite four years of absence, the show still remains one of the major international events.

This 54th edition has proved to be abundant in connections and opportunities for the aeronautical industry. The full booked order books reflect the confidence of the sector and the endless prospects for growth in air transport and the aviation industry associated with it.

Decarbonisation and recruitment were high on the agenda and remained the focus throughout the week.

Major OEMs reflected that the ramp-up of activity, although welcomed, generates supply chain challenges common to all players and while there is movement on decarbonisation, sustainability and net zero, much remains to be done and the sector must continue to accelerate its transition.

All of our members were represented at the Air Show and they have some very good news to share with you all in the section below.

Bonne lecture

Sincerely,

Marie Margaux Honikman
ADS Toulouse Director
