

# LEADING THE WAY IN SURFACE ENGINEERING

# Generations of experience

#### **History**

Established in 1931 and after three generations of private ownership, South West Metal Finishing have grown to become one of Europe's largest independently owned finishing groups.

#### **Flexibility**

With approximately 200 employees, working across 4 treatment facilities, and a truly global customer base, leading the way in surface engineering.

#### **Diversity**

SWMF have a growing property function supporting the Group, we're ideally placed to take on even the largest surface engineering projects, with full confidence in our robust financial support.

# Working together

Surface treatment surfaces to aerospace and high technology

#### NDT

SWMF offer a full suite of NDT capabilities, from MPI, FPI, Etch Inspection to Hardness and Conductivity Testing, you can be assured your project is in the most skilled hands.

#### Surface treatment

SWMF offer a wide range of high-end commercial treatments with batch production capabilities. Plus, we operate to strict NADCAP & AS9100 regulations.

#### **Paint facility**

Our state-of-the-art paint facilities offer myriad benefits, including multiple spray bake systems and sub assembly capabilities.

# Vision – Mission - Values

Surface treatment surfaces to aerospace and high technology

#### **SWMF** Vision

To Lead the Way in Surface Engineering

#### **SWMF Mission**

Provide industry leading surface engineering services for our customers

Continually grow through operational excellence and progressive innovation.

Safeguard the environment and ensure a rewarding future for our employees.

#### SWMF Values (PRIDE)

Passion -	Belief in what we do and a strong will to succeed
Respect -	Open mutual trust and respect for colleagues, customers, suppliers, neighbours and the environment
Innovation -	Embracing new technology, continually improving and providing technical solutions
Dedication -	To our customers, staff, the environment and the end produ
Excellence -	In our service levels, delivery, cost and quality

# **HHHH**

## Our guiding principles **SWMF 7 PILLARS STRATEGY**

productivity.

#### People

To be a respected employer of choice within the region, providing exceptional training & development opportunities.

#### **Technology**

Develop robust manufacturing systems which provide high levels of process repeatability, capability and products which are fit for purpose products.

#### **Customers** To offer Impeccable service

to our primary customers "Performance Sells"

#### Quality

Provide exceptional levels of product quality supported by robust NPI planning and manufacturing systems. NADCAP merit status at all sites. and 99.8% outgoing quality.

#### HS&E

Create a culture where everyone is committed to achieving zero accidents/incidents to employees and the environment.

#### **Commercial**

To protect financial margins through the deployment of continuous improvement initiatives and investment in "State of the Art" technology.

# Strategic partnerships

The partner of choice

#### Quality

With robust NPI and AQP protocols, as well as a raft of aerospace accreditations, SWMF work to the highest quality standards. In recent years, 99.8% of all projects were delivered successfully.

#### Delivery

SWMF offer industry-leading OTIF delivery rates and rapid turnaround times. Clients benefit from our large available capacity and fully owned transport network.

#### Service

All SWMF clients enjoy Singe Point of Contact project management, as well as regular KPI reviews. They also benefit from our in-house R&D solutions and REACH support.

#### Cost

Being an SWMF customer comes with a host of cost benefits, including Design for Manufacture support, smart tooling and numerous CI initiatives.

# Finishing capabilities

An extensive range of coating services

Electroplating	
Hard Chrome	
Nickel	
Cadmium	
Diffused Nickel/Cadmium	
Copper	
Sulphamate Nickel	
Electroless Nickel	
Silver	
Tin	
Zinc/ Nickel Alloy	
Zinc	

#### Anodising

Chromic Hard Hard / PTFE Sulphuric TSA, PSA

#### **Conversion Coatings**

Chromate conversion Passivation Phosphating Almbrite<sup>™</sup>

#### Paint

Wet paint Primer Top-coat Dry Film Lube (DFL) Light Assembly

#### Testing

Hardness Testing FPI – Fluorescent Penetrant Insp MPI – Magnetic Particle Insp Acid Etch Inspection Conductivity Testing Salt Spray & Humidity Testing

#### 12

# Almbrite

#### Surface treatment for additive manufacturing

#### **Enhanced surface finish**

Refines the surface Achieves a roughness of below 3.2Ra Produces an even Ra regardless of geometry complexity Enhanced detail definition

#### **Removes supports**

Removes the need to machine support structures

#### **Improves performance**

Improves fatigue strength Removes contamination Improves aesthetics and surface related functionalities REACh Compliant

# Approved and accredited

13

SWMF hold a wide array of industry approvals and accreditations

# Thank you
