

A STRONG FOOTPRINT IN FRANCE

NEWSLETTER #6 - JULY 2021

Dear all,

The summer has arrived and although COVID restrictions continue as we head into the second half of this year 2021, there is also a level of optimism driven by opportunities in evolution, leadership changes and industrial landscape reshaping.

Our industry is facing strategic and environmental challenges both in the short term and longer term and at ADS Toulouse we are keen and honoured to support our company members in their efforts to actively participate in these future missions and maintain their industrial capabilities and performance.

For example, one recent event we had with Airbus A220 and ATR highlighted the role of regional aircraft in tomorrow's aviation recovery. Regional aircraft will play a major part in this process and is ideal for the introduction of new technologies.

We therefore finish this semester stronger with the opportunities that lay ahead for the aerospace sector and welcome more positive news of future production rates.

We are looking forward to the return of face-to-face interactions this autumn with our participation in the Additive Manufacturing Summit in Toulouse in September and our "Working Breakfast" in the office.

ADS Toulouse is following the stream of evolution if not revolution expected and necessary in these moving times and we will keep you posted on some exciting projects hopefully in our next edition in October.

In the meantime, have a nice summer break and

Looking forward to seeing you all again after the holidays,

Sophie Morel
ADS Toulouse Director
